

## **CAHD™ Icons & Watermarks License**

Version 1.3 — October 2025  
© 2025 3DAllusions LLC™. All rights reserved.

### **0. DISCLAIMER**

The CAHD™ and CAHDD™ systems provide a voluntary framework for transparent disclosure of the human–technology creative balance. Use of CAHD™ icons, watermarks, or stage indicators does not constitute certification, verification, or legal proof of authorship. Responsibility for the accuracy of declared stages rests solely with the creator or entity applying the indicators. Neither CAHDD™, CAHD™, nor 3DAllusions LLC™ verify or guarantee claims made through the use of these marks.

### **1. PURPOSE**

The CAHD™ icons and watermarks are provided as transparent indicators of creative process stages (the “TechRatio™”). They exist to help artists, studios, musicians, designers, and creators disclose the role of human effort versus technological or automated assistance in their work. These icons are visual shorthand for communicating stage classifications to audiences, clients, and collaborators. They are not required to participate in the CAHDD™ philosophy — they are offered as free, standardized tools for those who wish to visually signal their TechRatio™.

### **2. PERMITTED USE**

You may freely use the icons and watermarks in your own creative works, media, or commercial materials to indicate CAHD™ stages.

You may resize the icons/watermarks proportionally and recolor them to harmonize with the artwork, content, or logo they accompany. Recoloring does not create a new design; the underlying icon remains the property of CAHDD™ and 3DAllusions LLC™.

You may integrate watermarks into your company or studio logo, provided the CAHD™ mark remains intact and recognizable.

You may redistribute the icons/watermarks only in their original form, as part of the official CAHD™ package with this license included.

You may create your own visual indicators to represent CAHDD™ stages, provided they do not copy or imitate the official icons in a way that may cause confusion. Community sharing of alternative indicators is encouraged, as long as proper attribution and stage alignment are maintained.

### **3. RESTRICTIONS**

You may not distort, redraw, rebrand, or alter the core shape, proportions, or design of the icons/watermarks.

You may not claim authorship of the icons/watermarks.

You may not sell, license, or distribute the icons/watermarks as standalone products or as part of another asset package.

Use of the icons/watermarks may not imply endorsement by CAHD™, CAHDD™, 3DAllusions LLC™, or its affiliates.

You may not use the icons or watermarks to knowingly misrepresent the creative process, TechRatio™, or stage classification of any work.

#### **4. COMMERCIAL CONTEXT**

The icons/watermarks may be used within commercial works (art, music, design, products) solely to indicate CAHD™ stages or TechRatio™.

Proceeds from works in which the icons/watermarks are embedded are permitted.

No separate commercial rights to the icons/watermarks themselves are granted.

#### **5. ATTRIBUTION**

Where practical, we encourage noting:

“CAHD™ Stage Indicator by 3DAllusions LLC™ — <https://CAHDD.org>”

Attribution is preferred but not mandatory when watermarking images directly.

#### **6. TRADEMARK & OWNERSHIP**

CAHD™, CAHDD™, TechRatio™, 3DAllusions LLC™, 3DAStudio™, MrMaterials™, and XtremeGraphxs™ are trademarks of 3DAllusions LLC™.

Use of the icons/watermarks does not transfer ownership of these marks.

Pairing or superimposing icons/watermarks into logos or artworks does not negate 3DAllusions LLC™’s ownership of the icons/watermarks.

The creative works to which these icons/watermarks are applied remain the sole property of their creators.

#### **7. FEEDBACK & COMMUNITY INPUT**

This system is intended to evolve. Suggestions and examples of alternate indicators are welcome and may influence future versions.

#### **8. TERMINATION**

Any use that violates these terms may terminate your rights under this license.

#### **9. PROOF & RECORDKEEPING**

The CAHDD™ framework operates on an honor system. Creators are strongly encouraged to retain working files, WIP images, or other supporting materials that demonstrate their declared stage classification. While CAHD™ icons and watermarks are not proof themselves, such documentation may support claims in the event of client disputes, platform takedowns, or copyright challenges.

Note: As provenance, metadata, and watermarking technologies evolve (e.g., C2PA, invisible watermarks), CAHDD™ indicators may also take the form of embedded or machine-readable signals. The principles of stage disclosure remain the same regardless of format.
